"Visual Debugger for C++ Object-Oriented Programs"

Nothing Found

Your search for **"Visual Debugger for C++ Object-Oriented Programs"** did not return any results.

You may want to try an Advanced Search for additional options.

Please review the Quick Tips below or for more information see the Search Tips.

Quick Tips

- Enter your search terms in lower case with a space between the terms.

      sales offices

  You can also enter a full question or concept in plain language.

      Where are the sales offices?

- Capitalize proper nouns to search for specific people, places, or products.

      John Colter, Netscape Navigator

- Enclose a phrase in double quotes to search for that exact phrase.

      "museum of natural history" "museum of modern art"

- Narrow your searches by using a + if a search term must appear on a page.

      museum +art

- Exclude pages by using a - if a search term must not appear on a page.

      museum -Paris

Combine these techniques to create a specific search query. The better your description of the information you want, the more relevant your results will be.

      museum +"natural history" dinosaur -Chicago

1 A survey of trace exploration tools and techniques
Abdelwahab Hamou-Lhadj, Timothy C. Lethbridge
October 2004 **Proceedings of the 2004 conference of the Centre for Advanced Studies on Collaborative research**
Publisher: IBM Press
Full text available: 📄 pdf(423.87 KB)   Additional Information: full citation, abstract, references, index terms

The analysis of large execution traces is almost impossible without efficient tool support.
Lately, there has been an increase in the number of tools for analyzing traces generated
from object-oriented systems. This interest has been driven by the fact that polymorphism
and dynamic binding pose serious limitations to static analysis. However, most of the
techniques supported by existing tools are found in the context of very specific visualization
schemes, which makes them hard to reuse. It i ...
